## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/AU2003/000931

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### 1. Statement

Novelty (N) Claims 1-11	NO
	1.0
Claims	3.700
Inventive step (IS) Claims 1-11	YES
Claims	NO
•	YES
Industrial applicability (IA) Claims 1-11	. NO
Claims	•

Citations and explanations (Rule 70.7)

#### Novelty (N) and Inventive Step (IS)

None of the cited documents disclose all of the features of each of the independent claims. Therefore all of the

In particular, none of the cited documents disclose a fruit and/or vegetable composition comprising at least one fruit and/or vegetable pulp and a mild base wherein said composition has a pH range of about 7.5-9.5, nor a process for producing said composition. Furthermore, none of the documents cited in the International Search Report teach or direct towards such a composition and thus, the claims are considered inventive.

#### Industrial Applicability (IA)

The invention defined in the claims is considered to meet the requirements of Industrial Applicability under Article 33(4) of the PCT because it can be made by, or used in, industry.

International application No.

PCT/AU2003/000931

## VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 1-7 are not fully supported by the description of this application. The description of this application is directed to the provision of an efficacious composition derived from natural ingredients that reduces or minimises skin irritation while treating and/or preventing dermatological and cosmetic disorders. These claims, however, are not limited to this use but only to compositions not even defined by being at least suitable for such a use. As such, these compositions may include foodstuffs or mixtures of pulps and mild base that do not reduce or minimise skin irritation while treating and/or preventing dermatological and cosmetic disorders. Such compositions are not supported by the description.
